

As effective as 80kg of powdered lime

eco-flo lime®

SUPERIOR ACID SOIL CORRECTION WITH HIGH CALCIUM LEVELS

ACTIVE INGREDIENTS: 23% w/v Calcium, 8% w/v Carbon

- Rapidly corrects acidic soils
- Liquid formulation works faster than powdered lime
- No digging required – just water it in
- Improves soil fertility and structure
- Boosts calcium and carbon for better fruit, veggies and flowers

DIRECTIONS FOR USE

Shake well, remove both plugs from nozzle and attach to hose. Spray solution evenly onto garden beds and lawns. **DO NOT ALLOW PRODUCT RESIDUE TO DRY ON FOLIAGE OR HARD SURFACES. RINSE OFF TO PREVENT SHORT TERM STAINING.**

AVOID APPLYING AROUND ACID LOVING PLANTS LIKE AZALEAS, CAMELLIAS AND GARDENIAS.

TO CORRECT ACIDIC SOILS

SOIL TYPE	HOSE-ON COVERAGE	WATERING CAN OPTION
Clay Soils	200m ²	50mL per 9L apply over 5m ²
Sandy & Loam Soils	270m ²	40mL per 9L apply over 5m ²

Test soil pH after 1-2 weeks and reapply if necessary.

GENERAL MAINTENANCE AND TO BOOST CALCIUM LEVELS IN YOUR SOIL

SOIL TYPE	HOSE-ON COVERAGE	WATERING CAN OPTION
Clay Soils	400m ²	25mL per 9L apply over 5m ²
Sandy & Loam Soils	800m ²	15mL per 9L apply over 6m ²

REPEAT APPLICATIONS

SITUATION	FREQUENCY
Acidic Soils	As required
Lawns & General Garden Beds	Twice a year for maximum plant health
Fruit and Vegetable Plants	Apply at the beginning of the growing season with a follow-up application 2-3 months later for heavy fruiting plants.
Fruit Trees	Apply twice a year, first at flowering and when fruit is half size.

PRECAUTION: Avoid eye and skin contact or ingestion of product.
