eco-oil®

ORGANIC MITICIDE/INSECTICIDE BOTANICAL OIL CONCENTRATE

ACTIVE CONSTITUENT 850 g/L EMULSIFIABLE BOTANICAL OILS

CONTROLS

CITRUS LEAFMINER, SCALE AND VARIOUS SAP SUCKING PESTS IN CERTAIN VEGETABLE AND ORNAMENTAL PLANTS IN THE HOME GARDEN. IMPROVES WETTING AND STICKING OF SPRAYS.

ATTRACTS GOOD BUGS INTO YOUR GARDEN

HIPPO ENHANCED.

Scale

Two-spotted Mite

Aphids

Whitefly

Citrus Leafminer

CONTENTS
500 mL

ACO CERT. NO. 222

Y20-2824

HOW TO USE

DO NOT spray eco-oil in temperatures exceeding 35°C.

DO NOT spray directly on to sensitive flower heads, apply to foliage only to prevent oil spotting.

DO NOT apply to plants suffering from heat or moisture stress.

INSECTICIDE USE

PLANTS	PESTS	RATE	HOW TO APPLY
Tomatoes, cucumbers, capsicums, strawberries and ornamental plants	Two-spotted Mite Aphids Sooty mould	Mix 5mL of product to 1L of water	Spray when pests first appear. Apply two sprays 3 to 5 days apart. Repeat applications at signs of reinfestation. Spray both upper and underside of leaves to run-off. DO NOT apply more than three sprays to plants within a 4 to 8 week period.
Vegetables and ornamental plants	Greenhouse Whitefly		
Ornamental plants	Mealybugs Sooty mould	10mL of product to 1L of water	Apply at early signs of Mealybugs and Scale. Apply two sprays at 7 day intervals. Repeat applications at signs of reinfestation. Spray upper and underside of leaves and branches to run-off.
Olive trees	Black scale		
Citrus	Citrus Leafminer	10mL of product to 1L of water	Begin applying when the new flush growth is about 4 cm long. Apply every 5 to 14 days with presence of new flush growth. Ensure that the new flush leaves are sprayed both on top and underneath. Do not apply any more than 8 times per season.

SPRAY ADDITIVE USE – TO IMPROVE WETTING AND STICKING OF SPRAYS

Spray additive for insecticides, fungicides and foliar fertilisers	-	5mL per 2 litres of spray mix	Rate is given as a guide only. Always follow directions on pesticide label where addition of a botanical oil concentrate is recommended.
--	---	-------------------------------	--

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED. WITHHOLDING PERIOD: Not required when used as directed.

HOW TO PREPARE:

eco-oil is a botanical oil based miticide/insecticide that controls pests by contact. As such complete coverage of plants is important. For best results spray with eco-oil at the first sign of pest infestation. Repeat application may be necessary. Some plant species (like maidenhair ferns) are more sensitive than others so it is recommended that a pre-test be conducted on a small area of foliage before using. Do not exceed recommended dose rates.

HOW TO MIX:

1. Half fill the spray container with clean water.
2. Add the required amount of eco-oil, shake, then top up container with water and shake again.

Frequent agitation (shaking) of the spray solution is recommended during application.

CAUTION: DO NOT allow chemical containers or spray to get into drains, sewers, streams or ponds.

STORAGE AND DISPOSAL: Store in the closed, original container in a cool, dry place out of reach of children. Do not store in direct sunlight. Dispose of empty container by wrapping in paper, placing in plastic bag and putting in garbage.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre. **Phone Australia 131 126.**

FOR EMERGENCIES ONLY CALL: 1800 033 111 (24 HOURS).

eco-oil and HIPPO Enhanced are registered trade marks and the OCP drop device is a trade mark of Organic Crop Protectants.
