

Grow Better Orchids with our 'Secret' Recipes

Recipe 1 - Bigger Flowers & Better Health

eco-aminogro	5ml	} per litre of water
eco-seaweed	1/2g	
eco-oil	2ml	

Use this recipe to see larger flowers with more colour, greener leaves, longer vase life **and** reduced pest and disease problems.

Apply every 2-3 weeks as a foliar spray for strong, healthy orchids. Can also be watered into the growing media of your orchids but without the eco-oil.

Calcium 'Top Up' - Apply liquid **eco-flo dolomite (25ml per 9 litres of water)** twice a year to growing media to boost calcium and magnesium levels.

Recipe 2 - Pest & Disease Control

eco-aminogro	5ml	} per litre of water
eco-seaweed	1/2g	
eco-oil	5-10ml	
eco-fungicide	3-4g	

Increase eco-oil and add eco-fungicide to the recipe to control common pests and diseases of orchids while still promoting amazing growth and vigour. In general, take a proactive approach and spray every 1-2 weeks to maintain clean, healthy plants. Frequency may need to be increased depending on the cultivar, conditions and the pests and diseases that are present. Refer to product labels for more information.

If you get **hard to kill chewing & sucking insects** then boost Recipe 2 with:

eco-neem* 2-3ml per litre of water

* Once diluted always use the eco-neem solution straight away.

eco-aminogro is a powerful organic fertiliser made from marine waste which is digested down into amino acids and fortified with a range of trace minerals and vitamins. eco-aminogro is rapidly absorbed by plants resulting in excellent growth premium quality flowers. It also helps the plant's immune system fight disease/fungal attack.

eco-seaweed is an extremely concentrated powdered seaweed extract. It contains over 60 essential plant growth hormones, vitamins and other nutrients including 16% potassium. eco-seaweed stimulates root development, cell division (growth) and flower initiation. It also helps plants cope with various environmental stresses. Contains no preservatives just pure seaweed extract.

eco-oil is an organic insecticide that kills a range of sap sucking insects like aphids, mites, whitefly, scale and citrus leafminer. The new HIPPO Enhanced formulation also attracts beneficial insects into the garden which in turn feed on pest insects. Made from 100% plant oils, with no petroleum derivatives. It works at low rates (5-10ml per litre) and has a reduced risk of burning foliage compared to petroleum oils (eg white oil and Pest Oil). It can also be used as a "wetter, sticker, spreader" at 2ml per litre.

eco-fungicide is a safe, broad-spectrum fungicide that controls a range of foliar diseases including powdery mildew, black spots and rust. eco-fungicide works rapidly (within 5-10 minutes) to destroy existing fungal growth and leave a protective barrier on leaves to prevent new spores germinating. Works best when mixed with eco-oil to ensure it spreads evenly and sticks well to leaves. eco-fungicide is also sold as eco-rose.

eco-neem is a broad range insecticide that kills chewing and sucking insects. It contains a natural botanical extract from the neem tree along with other plant oils. Once ingested insects stop feeding and starve to death. Insect growth is also distorted. Currently in Australia eco-neem is registered for 8 insects but overseas it is registered to control over 200 pest insects.

eco-flo dolomite is a super concentrated, liquid soil improver that boosts calcium and magnesium as well as correcting soil acidity for stronger plant growth. It's faster acting than traditional powdered dolomite and enhanced with seaweed extracts.

Available from nurseries, Bunnings & independent hardware stores. Also available online at www.ecoorganicgarden.com.au
