

HOW TO USE

DO NOT apply oil sprays within 10 days of applying chlorothalonil.

PLANTS	DISEASE	RATE	HOW TO APPLY
Roses	Powdery Mildew Black Spot	Mix 30-40 g per 10 L of water and add 20 mL emulsified vegetable oil.	Begin application at first sign of disease. Repeat applications at intervals of 10 days or more as new growth or infection occurs, or if conditions favour disease.
Geraniums (pelargoniums)	Rust (<i>Puccinia pelargonii-zonalis</i>)	40 g per 10 L of water and add 30 mL emulsified vegetable oil.	Begin application at first sign of disease. Repeat application at 7 day intervals. Apply to ensure complete and thorough coverage of all plant surfaces. Pay particular attention to the underside of leaves.
Grapevines	Powdery Mildew (<i>Oidium</i> spp.)	Mix 40 g per 10 L of water and add 20 mL emulsified vegetable oil.	Begin application at first sign of disease. Repeat applications at intervals of 10 to 14 days as new growth or infection occurs, or if conditions favour disease. Apply to ensure complete and thorough coverage of foliage.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED.
WITHOLDING PERIOD (WHP): NOT REQUIRED WHEN USED AS DIRECTED.

FUNGICIDE

ACTIVE CONSTITUENT: 940 g/kg POTASSIUM BICARBONATE

FOR THE CONTROL OF POWDERY MILDEW AND
BLACK SPOT IN ROSES, AND MANAGEMENT OF
RUST IN GERANIUMS IN THE HOME GARDEN.

NET CONTENTS
500 g

MAKES
UP TO 160 L
OF SPRAY

HOW TO PREPARE

eco-rose is a contact fungicide containing activated potassium bicarbonate that requires direct contact with the fungus organism for control. **eco-rose** disrupts the fungus cell, causing the cell walls to collapse. Under conditions highly favourable to the disease, control may not be achieved and suppression only can be expected.

eco-rose rapidly kills both powdery mildew and black spot spores and hyphae.

MIXING: Half fill spray tank. Slowly add required amount of **eco-rose** whilst stirring. Top up with required quantity of water. Mix well before commencing spray procedure. Do not allow mixtures to stand. Use within 24 hours of mixing.

APPLICATION: Contact with the disease organism is essential for control; as such apply in sufficient water to ensure complete and thorough coverage of foliage and/or crop. Ensure plants are not suffering from any environmental stress such as moisture stress or heat stress when applying **eco-rose** to control high levels of powdery mildew or black spot infection as water loss from the infection site can cause death of plant tissue.

CAUTION: DO NOT allow chemical containers or spray to get into drains, sewers, streams or ponds.

STORAGE AND DISPOSAL: Store in the closed, original container in a cool, dry place out of the reach of children. Do not store in direct sunlight. Dispose of empty container by wrapping in paper, placing in plastic bag and putting in garbage.

SAFETY DIRECTIONS: May irritate the eyes. Avoid contact with eyes. Wash hands after use.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre. **Phone Australia 131 126.** For Emergencies only call: 1800 033 111 (24 hours).

LIABILITY: This product must only be used as directed. OCP will not be liable for any loss or damage due to a failure to strictly follow label directions.

eco-rose and **eco-oil** are registered trade marks and the OCP drop device is a trade mark of Organic Crop Protectants.
